Harry's movie corner

Director James Gunn decided to put an interesting twist on the otherwise unknown Marvel superhero team when adapting it to the big screen. This film is part comedy, part romance, part action and part 80s movie. This movie is great and definitely a fun ride through the galaxy. Its obvious that Marvel is trying to expand its universe (literally and figuratively) as the whole plot revolves around new characters and expanding the cast of characters. Although most of the time it feels like you're just watching a commercial for the next Avengers film, its still a pretty damn good commercial

Release date: August 2014

Movie Budget: US\$170 million

Genre: Action, Comedy-Romance

Available: Still screening at the cinemas
